

## T.F. Allen´s Encyclopedia online !

“The **Encyclopedia of Pure Materia Medica**: A Record of the Positive Effects of Drugs Upon the Healthy Human Organism” von Timothy Field Allen (1837-1902) is the largest collection of proving data ever, written 1874–1879 in 12 Volumes.

It contains most of the provings that had been conducted until that time and a lot of toxicological data as far as it was known then. The first 10 Vol.s contain the original material in alphabetical order, Vol. 11-12 are an index to symptoms.

Until recently this huge amount of material was only accessible in printed form or integrated in some of the homeopathic computer programs with materia medica, and always quite expensive.

Now this Encyclopedia is also available online and free of copyright.

For the selection of remedies in Allen please see the following pages.

**How to:** Please find out first in which volume your remedy will be.

Then click on the link “Volume xy” in our left column. This takes you to a page with the bibliographical data of the book. In the left side menu of it you find a choice, how to read the book. Chose your format and click on the link.

Or you click on the link “Volume xy direct pdf” in our right column, which takes you directly to the pdf download.

→ The book will start to download. Each of the volumes has around 30-40 MB, so depending on your connection this may take a few minutes. You can either read the Encyclopedia in your browser or download it to your system.

Please be aware that Vol. 10 contains an appendix with 300 remedies, which are again in alphabetical order, many of which have already been part of the earlier Vol.s. So it makes sense to look for your remedy in both places in the index.

Many of the remedies in Allen have been given names, that are not used nowadays. Please have a look at the substance page in our database to see alternative names. Uncommon names given by Allen are marked as (Allen).
